

An ISO 9000 : 2001 Certified Company

Manufacturer Of Disposable Surgical Products

### Infusion Set

The material used to manufacture this Infusion Set is of medical grade non-toxic plastic granules.

- Certain other features are:
- Precision moulded drip chamber with sharp spike for smooth penetration.
  - Clear transparent chamber to see fluid flow.
  - Smooth, flexible, kink resistant tubing which is made up of non toxic medical grade P.V.C. granules.
  - Provided roller clamp for controlled flow of fluid.
  - Self sealing Latex tube for additional medication.
  - Sharp, smooth vein needle (21 G) for non traumatic cannulation.
  - Sterile by ETO gas.
  - The set is for single use, Non Toxic, Non Pyrogenic, and sterile.

### Urine Drainage Bag

Our sterile ready for use urine bags are designed for short and long term urine collection.

- Made of medical grade soft and transparent PVC sheet.
- Extra pressure resistant leak proof bags.
- Provided with thick, soft, kink free PVC tube.
- Easy to read accurate scales.
- Efficient non-return valve.
- Capacity: 2000 ml
- Individually packed in pouch.
- Sterile by ETO gas.

### Surgical Latex Gloves

Our surgical gloves are made from natural rubber

- Other features:
- A-grade quality.
  - Rough texture.
  - Pre-powdered.
  - Sizes: 6, 6 1/2, 7, 7 1/2, 8
  - Sterile by ETO gas.

### Blood Transfusion Set

The clear, transparent ad soft tubing is manufactured from medical grade PVC. The material used to manufacture these blood administration sets is completely non-toxic and causes no harm to humans or the environment.

- Certain other features are:
- Cylindrical drip chamber fitted with nylon filter to eliminate the risk of clotting in the vein.
  - Clear transparent chamber to see fluid flow.
  - Smooth, flexible, kink resistant tubing which is made up of non toxic medical grade P.V.C. granules.
  - Provided roller clamp for controlled flow of fluid.
  - Self sealing Latex tube for additional medication.
  - Sharp, smooth vein needle (18 G) for non traumatic cannulation.
  - Sterile by ETO gas. The set is Non Toxic, Non Pyrogenic.

### Umbilical Cord Clamp

The umbilical cord clamps are designed to clamp the umbilical cord immediately after birth. The clicking system ensures that the lock is closed properly, and this lock also ensures against the accidental reopening of the clamp.

- Other features:
- Sterile by ETO gas.
  - Non Toxic, Non Pyrogenic.

### Profile

At Amigo Surgi-Care Pvt. Ltd., we are trying our best to convert all challenges into opportunity in order to meet all latest needs of the disposable surgical products. We are fully involved and engineering new surgical products particularly in intravenous transfusion devices. Our aim and objective is to develop multichannel and multibarrel intravenous cannula and devices to facilitate professionals for administering fast, accurate and multiple injection fluid during critical stage of the patients. Our all Products had captured maximum share of Indian market and we also penetrating fast into international market. We are treating and applying high medical grade polymers and best grade of S.S. Cannula. Our research and development experts are aiming fast for new design and development of new devices. Process and manufacturing are the core area of our high concern and run by technocrats. Clean room and its consistency are on high focus area maintained and inspected by laboratories experts. Sterilization a key norm related to product life is processed and managed well. The quality assurance of the product is being supervised by well experience pharmacy professional. Our factory is situated at most green and pollution-free outskirts of Ahmedabad known as Rakanpur (Santej) industrial zone about 3 km from science city.

### Product Range

- Intravenous Cannula
- Infusion Set
- Blood Transfusion Set
- Measured Volume Set
- Micro drip Infusion Set
- Urine Collection Bag
- Surgical Latex Gloves
- Umbilical Cord Clamp
- Mask, Cap & Apron

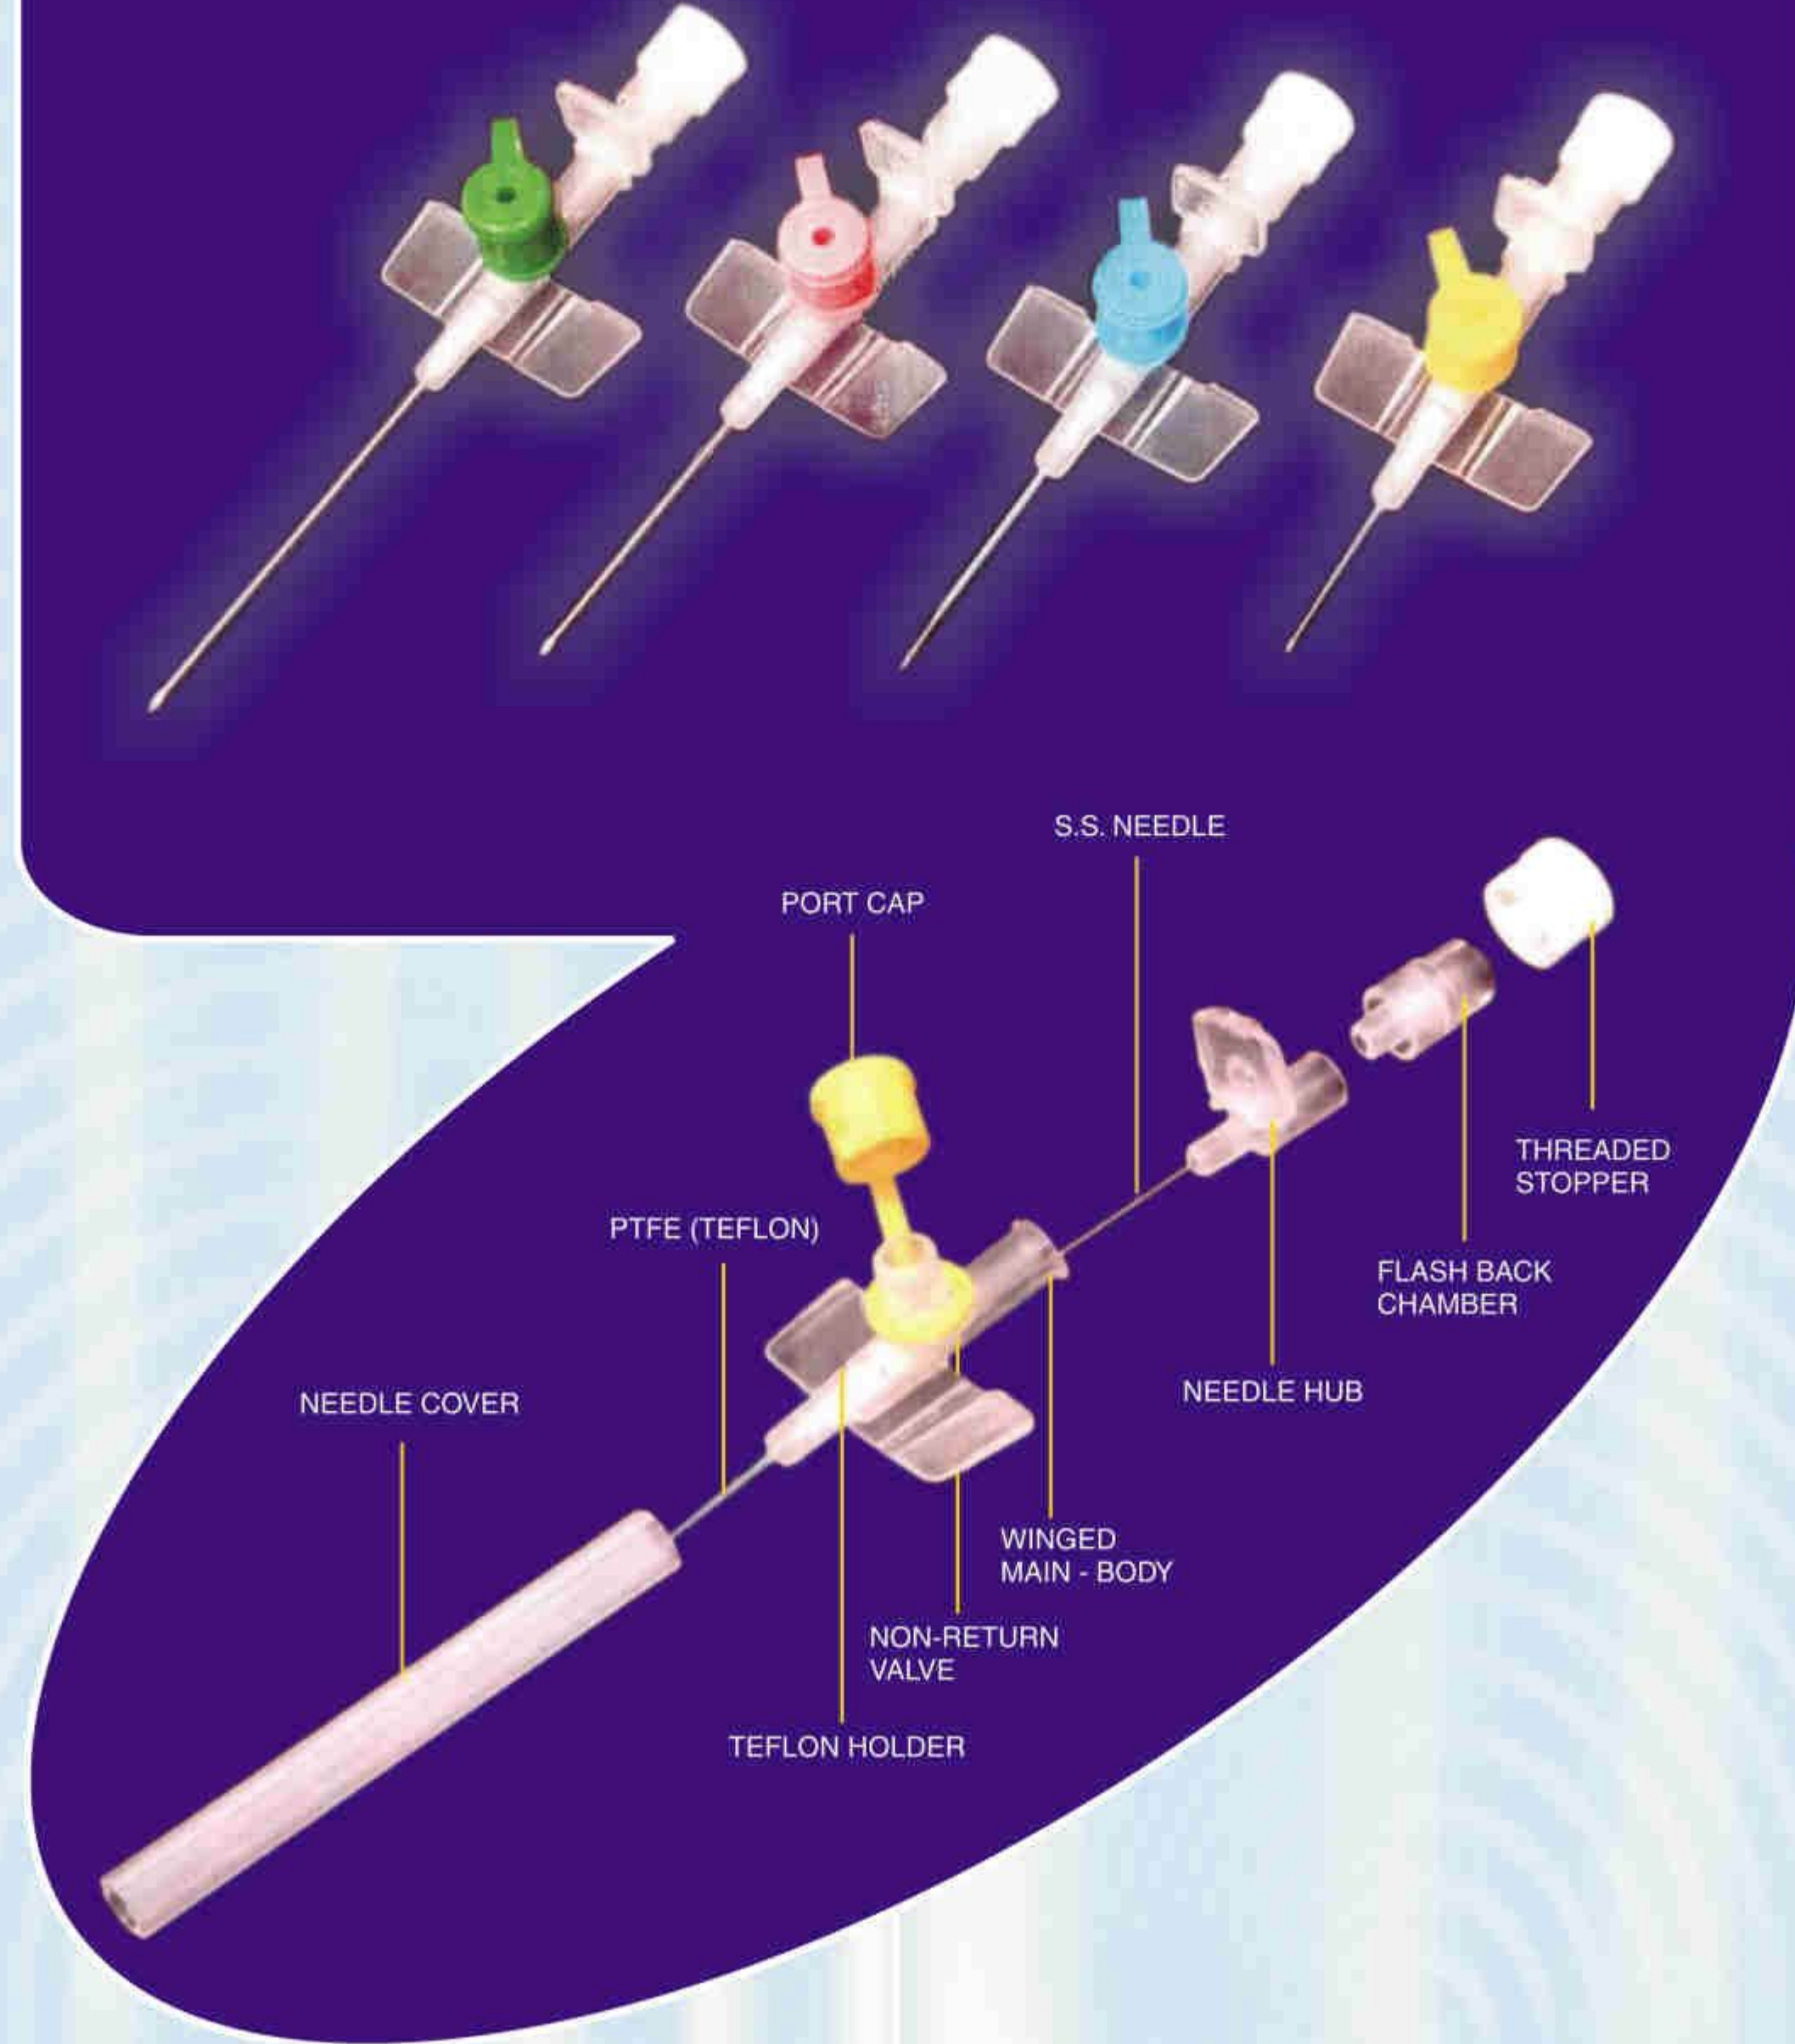

### Quality Commitment

As we understand the quality standards therefore we accept and committed to quality of product with emphases which may cost and hard to follow. Our quality standard starts from concerned man, material, manufacturing and ends with quality management hence our products are results of self-declaration of quality.

### Trade Enquiry

We will have great pleasure to know about your valuable inquiry for domestic marketing of all products. We also have great interest and inclination to manufacture all the products on loan-license basis or third party arrangement. We are very keen to negotiate with export oriented house to market our product into international market. You may send your trade inquiries on our communication address or E-mail at our ID: [cannulaexpert2001@yahoo.co.in](mailto:cannulaexpert2001@yahoo.co.in)

## AMIGO I.V. CANNULA

### Intravenous Cannula with Injection Valve

We offer our range of I.V. Cannula with injection valves and PTFE catheter. We provide international colour codes which facilitates the easy identification of size. The sets are manufactured from high-grade non-toxic material, making it safe for humans and the environment. Some of the other salient features are:

- **S.S Cannula** having double back cut ground stainless steel needle for smooth and painless vein puncture. We import it from Japan. We silicised the same.

- **PTFE Catheter:** Internationally accepted excellent quality Teflon (Poly Tetra Fluoro Ethylene) is completely imported. The tip of the catheter is tapered on automatic machine for easy insertion into the vein.
- **NON-RETURN Valve:** Side injection valve for easy access of intermittent administration of fluid with non-return valve which prevents the back flow.
- **PEEL-OFF Paper:** A medical grade grid paper is used for blister packing which provides the effect of easy & smooth peeling.
- Sterile by ETO gas.
- Non Toxic, Non Pyrogenic.
- Sizes: 14G, 16G, 18G, 20G, 22G, 24G
